GENERAL INTRODUCTION:

The Shure Broadcast Desk Series SH-BROADCAST2 is a premium, low-profile desk-mounted microphone boom arm designed to stay below the shoulder line. It offers extreme versatility to broadcasters, podcasters, and streamers seeking a discreet desktop miking solution with an unobstructed view. The boom arm includes two mounting options: a desk clamp that can mount on surfaces up to 2.17 inches (55mm) thick, or a direct mount that can be drilled into your desktop for a more permanent mounting solution. Constructed from heavy-duty steel, the boom arm offers a full 360-degree horizontal adjustment and a 90-degree upper vertical adjustment. Fully extended, the SH-BROADCAST2 spans up to 33 inches (838mm) to cover the largest desktop setups. The heavy-duty design supports a weight capacity of up to 4.4 lbs. (2kg), and the convenient top-mounted magnetic cable channels provide clean cable management, keeping your desktop clutter-free. The threaded extension provides additional clearance, making it an excellent match for your preferred Shure SM7 or MV7 Series microphones.

COMPONENTS:

A. DESK CLAMP

B. BOOM ARM

C. S3 HEXAGON WRENCH

D. S4 HEXAGON WRENCH

E. DIRECT DRILL MOUNT

F. DRILL MOUNT SCREWS (X3)

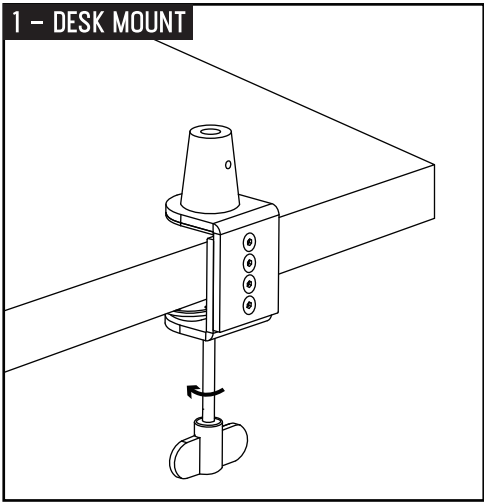

G. EXTENSION ADAPTER

FOR SM7 & MV7 SERIES MICS

ASSEMBLY INSTRUCTIONS:

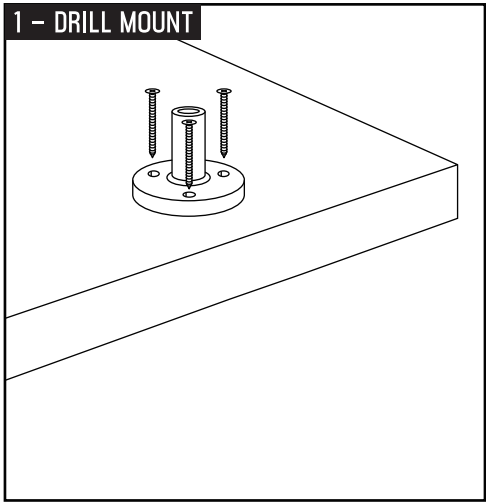

STEP 1 [DESK MOUNT OPTION]

Secure desk mount (A) onto surface by twisting the handle until it is firmly tightened.

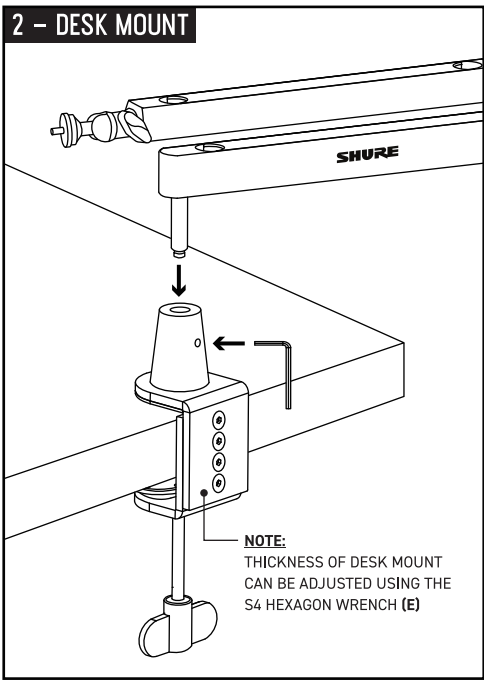

STEP 1 [DIRECT DRILL MOUNT OPTION]

Secure direct drill mount mount (E) onto surface using direct drill mount screws (F).

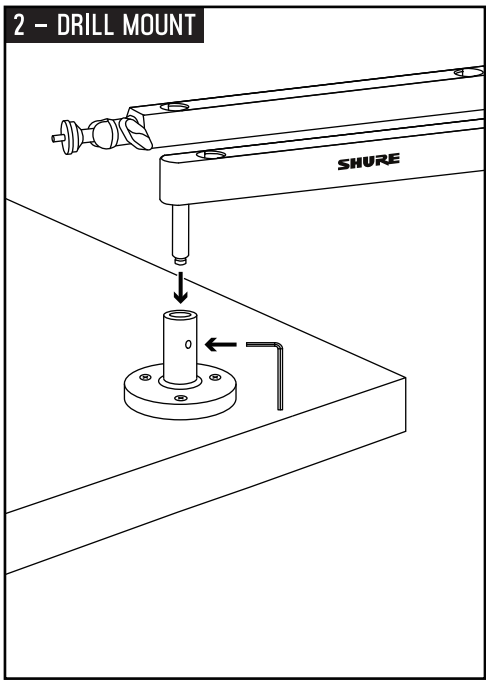

STEP 2 [DESK MOUNT OPTION]

Insert base of boom arm (B) into the desk mount (A) hole and fasten using the S3 hexagon wrench (C).

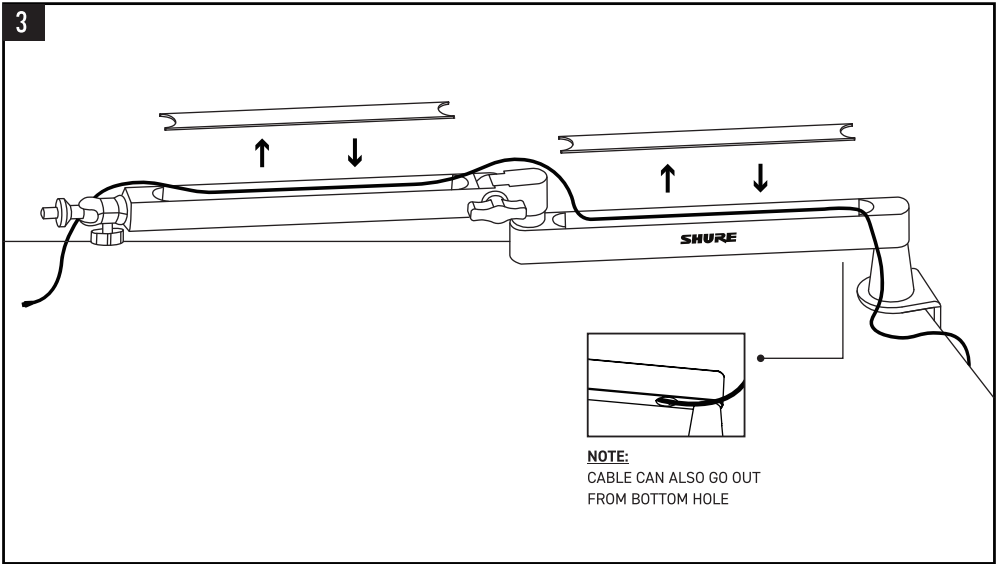

STEP 2 [DIRECT DRILL MOUNT OPTION]

Insert base of boom arm (B) into the direct drill mount (E) hole and fasten using the S3 hexagon wrench (C).

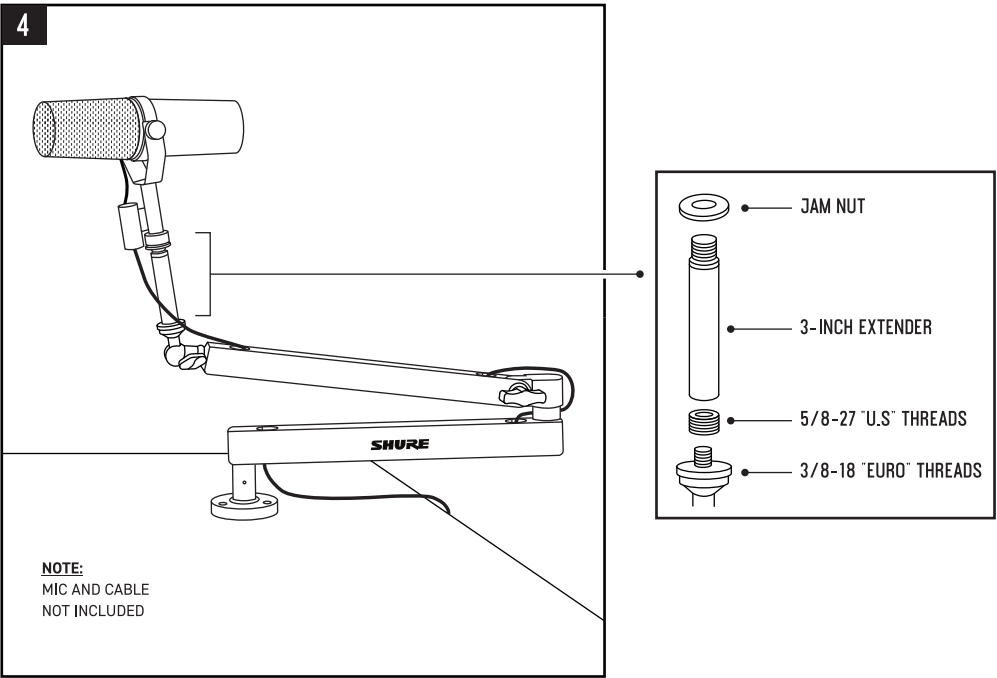

STEP 3

Remove magnetic cable cover and thread cable inside boom arm (B). Then secure magnetic cable cover back into position.

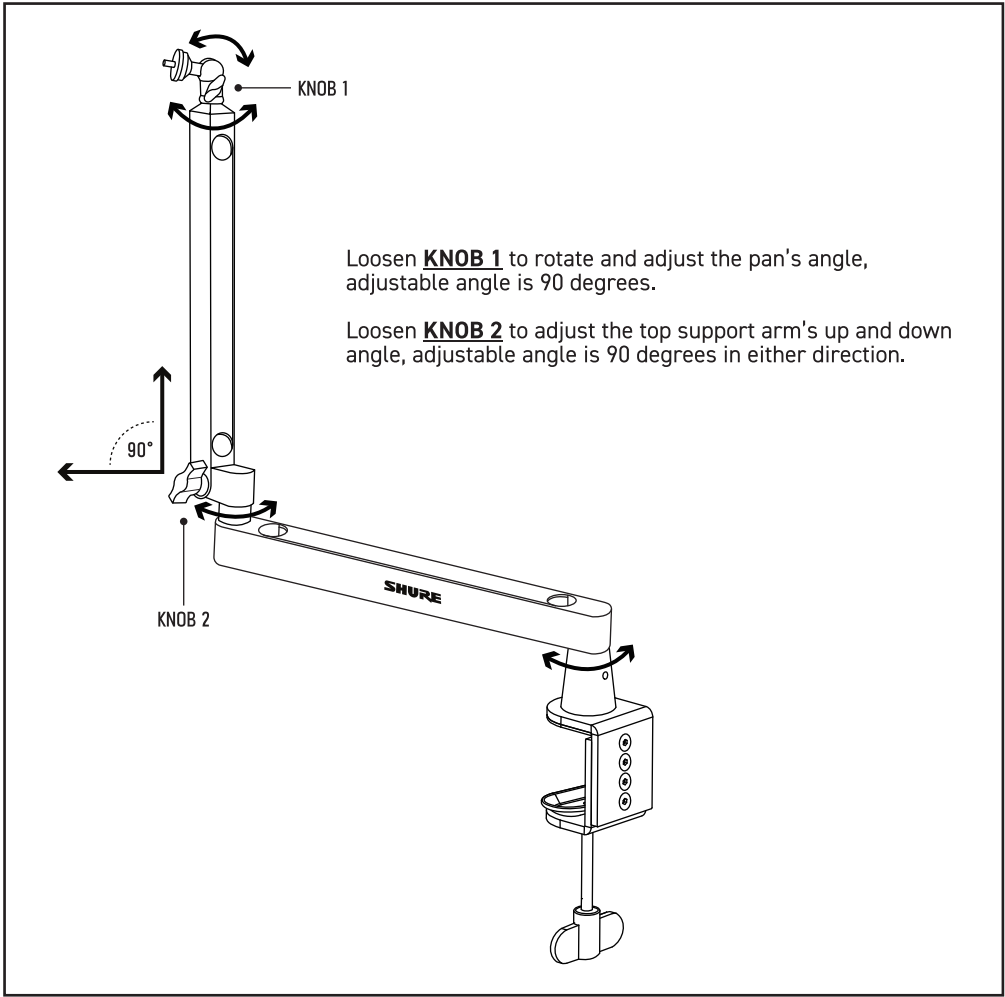

STEP 4

With **KNOB 1** tightened to desired position, install your microphone. Note, that the SM7 series mics will require you to install the extension adapter (**E**) first as shown in the image below.
