## MESH CABLE MANAGEMENT SYSTEM

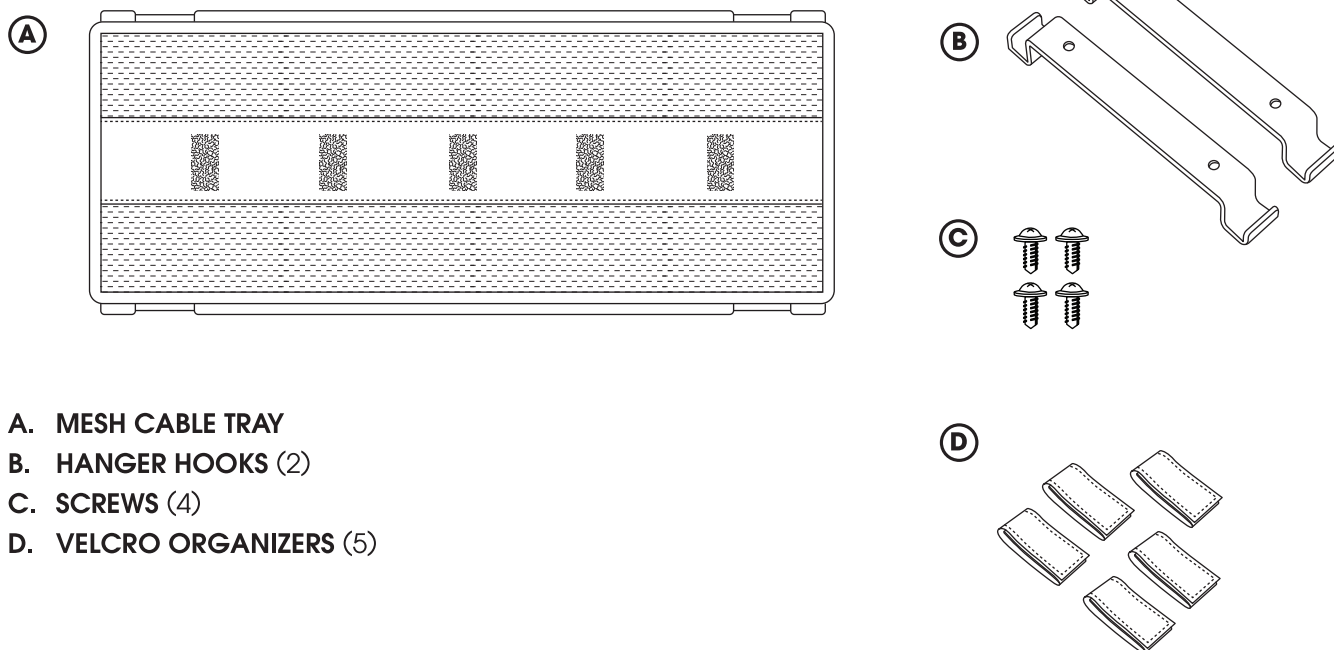

### ASSEMBLY INSTRUCTIONS

# GATOR FRAMEWORKS

## GENERAL INTRODUCTION:

Streamline your workspace with the Frameworks Mesh Cable Management System, a must-have for both recording studios and office setups. This innovative cable manager mounts neatly under your desk, providing a designated space to organize excess cables, power strips, and power bricks for a clean, professional look. Its durable mesh construction, reinforced with aluminum support rods, keeps cables secure while allowing for airflow to prevent overheating—a perfect fit for tech-heavy environments. Conveniently spaced cable ties at 1" intervals offer easy pass-through and help keep cables precisely in place. Complete with all necessary mounting hardware, this cable manager is the ultimate solution to eliminate clutter and keep your setup looking sharp and functioning efficiently.

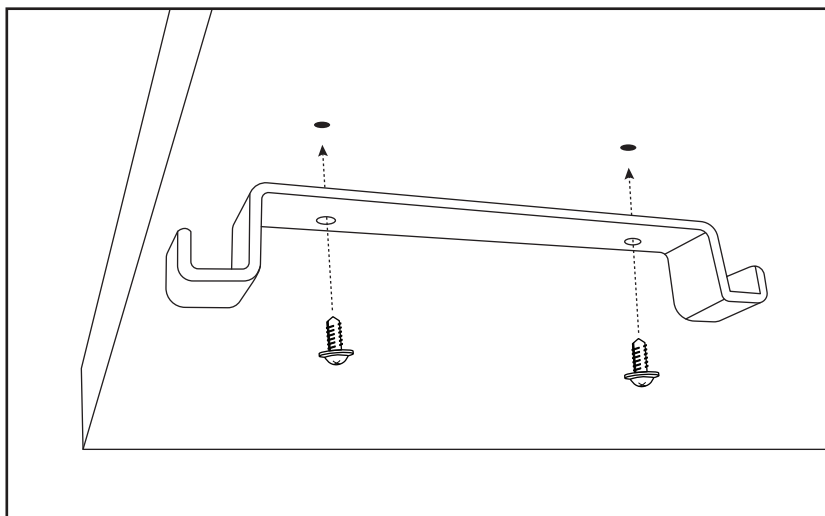

## COMPONENTS:

- A. MESH CABLE TRAY
- B. HANGER HOOKS (2)
- C. SCREWS (4)
- D. VELCRO ORGANIZERS (5)

## ASSEMBLY INSTRUCTIONS:

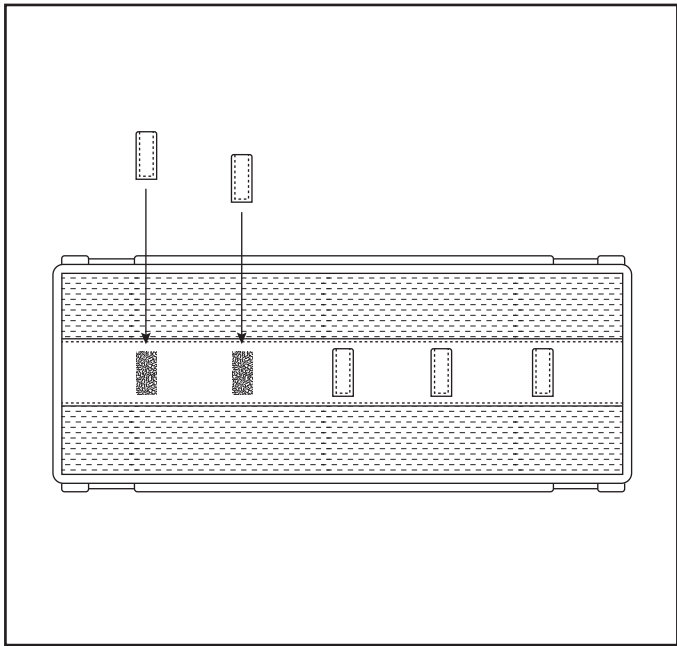

- 1 Hold hanger hook (B) under desk in your desired location. Using a pencil, mark the screw holes.
  - 2 Drill pilot holes at the marks for easier screw installation. Align the hook's screw holes with the pilot holes and secure it using the provided screws (C) with a drill or screwdriver.
- Repeat this step with the second hanger hook.

ASSEMBLY INSTRUCTIONS:

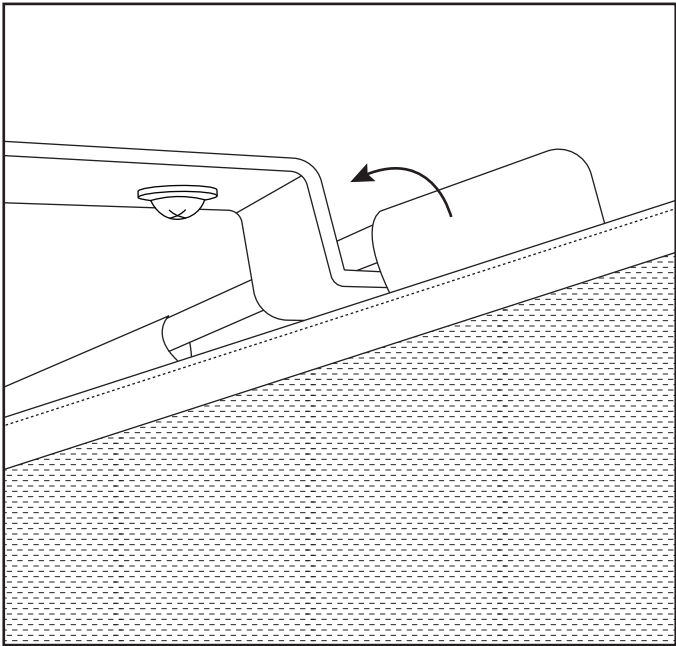

3

Attach the velco cable organizers (D)

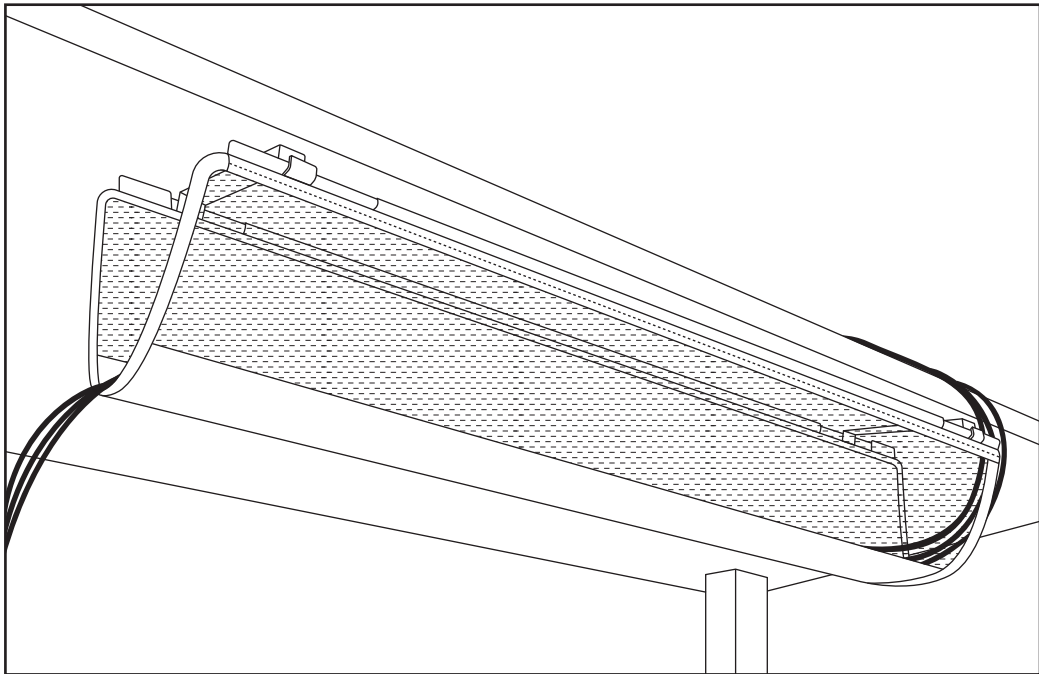

4

Hang the mesh cable tray's (A) aluminum support rods onto the hooks.

5

Thread cables through the mesh cable tray (A) and use the velco organizers (D) to group the cables together.
